The screenshot shows the AWS RDS Databases page. At the top, there's a search bar and navigation links for 'Dhara Mehta', 'N. Virginia', and 'Support'. Below the header, the 'Databases' section is visible with a 'Create database' button. A table lists a single database instance: 'mydatabaseinstance' (Instance type, MySQL Community engine, us-east-1f region, db.t2.micro size, Available status). The table has columns for DB identifier, Role, Engine, Region & AZ, Size, and Status. The bottom of the screen shows the Windows taskbar with various pinned icons and the system tray.
